PROFESSIONAL OBJECTIVE

A motivated Software Engineering graduate with a strong foundation in programming, IT support, and applied Artificial Intelligence tools. I am seeking an entry-level opportunity in the AI or IT field where I can apply my technical knowledge to solve real-world problems and support digital transformation. My goal is to grow within a forward-thinking organization aligned with **Saudi Vision 2030**, particularly in advancing Artificial Intelligence, innovation, and smart technology solutions.

EDUCATION

Bachelor's Degree in Software Engineering
University of Hail – Hail, Saudi Arabia
Graduation Year: 2026

EXPERIENCE

Cooperative Training – IT Department King Khalid Hospital (KKH) – Hail, Saudi Arabia
June 2025 – December 2025

- Provided technical support to hospital staff by diagnosing and resolving software and hardware issues.
- Installed, configured, and maintained operating systems and system utilities to improve device performance.
- Leveraged AI tools and troubleshooting techniques to resolve hardware, software, and performance-related issues efficiently.

PROJECT

Graduation Project | IT Technical Support Management Website
King Khalid Hospital (KKH) – 2025

- Designed and developed a web-based technical support management system for hospital IT operations.
- Built backend functionality using **Node.js** and **Express.js**.
- Developed a centralized platform for submitting, tracking, and managing device-related complaints.
- Generated statistical reports to support service improvement and management decisions.
- Improved administrative efficiency by reducing maintenance request processing time.
